CMA Serie

Push-Pull / Quick-Releasable Connector

… For an optimum data transfer in harsh environments !

Catalog

B

BERNIER

BERNIER

◆ Description

BERNIER designed the CMA line specially for equipment in harsh environments. The CMA connectors are available equipped with 04, 06, 10, 14 and 22 contacts, their toughness and ergonomics are apreciated in a wide range of applications.

The CMA connectors comply with DEFENSE GAM T2 norm, registered in GAM T1 and comply with specification DTAT n°2559A.

◆ Applications

Radios

Accessories

Intercoms

Crypted data

Push-Pull   **Ergonomics**

Stainless steel

EMI RFI Protection

Multi-Contacts   **Watertightness**

Optronic devices

Future soldier

Ruggedized computers
Tactical equipements

Specific Designs

◆ **The Right Solution for your projects**

CMA connectors are appreciated for their flexibility to fit customer specifications.
Our Design team is able to propose versions answering to your needs. Reinforcements can be applied in case of use in harder climatic, ergonomic and electromagnetic conditions.
The CMA line evolution led by BERNIER has come to integrate electronic modules in the connector shell to carry wireless functions or to make adaptators towards other industrial or military connectors.
Caps and backshells can also be improved to bring a better ergonomics on your configuration.

◆ **EMC reinforcements**

Options are available in order to reinforce the EMC specifications.

Ground ring « 360° »

Conductive O rings

Ground pin

CMA standard receptacles are equipped with a ground ring giving a high EMC level. This function developed by Bernier brings a better continuity between the con-nectors shells and a protection on 360°

The receptacle Fluorosilicon Oring can be switched to a conductive version to establish a better conductivity between the connector and the panel.

One or several ground pins inserted in the connector shell can be set to link the chassis ground directly to the PCB.

◆ Climatic and mechanical characteristics

	Push-Pull version	'L' Quick releasable Version
Unlocking system	Manual action on ring	Axial force (30N ≤ F ≤ 70N)
Operating temperature Range	-55°C to +125°C	
Endurance	10 000 operations 5000 operations (22 contacts)	2000 Operations
Sealing performance	IP68 (Mated and unmated)	
Corrosion resistance	Salt fog : 96 hours, 250 hours, 500 hours depending material	
Vibration	55 Hz to 2000 Hz, 10g (6 hours)	
Fluids resistance	Oils and hydrocarbons	

The Push-Pull version and the quick-releasable version mate on the same receptacle

◆ Electrical characteristics

	04 contacts version	06 contacts version	10,14 contacts version	22 contacts version
Working voltage	100 V_{max}		60 V_{max}	
Current rating per contact	4 A_{max}	4 A_{max} (2cts) 1,5 A_{max} (4cts)	1,5 A_{max}	2 A_{max}
Gauge (AWG)	18	18 (2cts) 22 (4cts)	22	26
Contact type	Solder buckets / For PCB			
Contact resistance	≤ 10 mOhms			
Insulation resistance	>1000 MOhms under 500 V_{DC}			
Crosstalk	80 dB at 8 kHz			-
Dielectric	500 $V_{AC\ RMS}$ at 50 Hz			
EMI RFI Protection	Yes			

◆ Material and plating

	Matérials	Plating
Connector shell	Stainless steel Navy stainless steel / Bronze	Sandblasting or Black Chrome
Insulator	Thermosetting (04,06,10,14 cts) PBT (22 cts)	-
Contacts	Copper alloy	Gold over nickel
Ground ring	Beryllium Copper	-
Backshell shell	Aluminium alloy	Black Chrome or Black Anodizing

RoHS 2 COMPLIANT

REACH COMPLIANT

Weights

◆ Connectors

Type	Weight (Max)
CMA 1 (Extension)	20 g
CMA 3 (Panel through)	23 g
CMA 5 (Push-Pull plug)	30 g
CMA 6 (Dummy receptacle)	16 g
CMA 7 (Receptacle)	18.5 g

Stainless steel version

◆ Elbow parts

Type	Weight (Max)
CMA RA8	21 g
CMA RA82	18 g

◆ Elbow and straight backshells

Type	Weight (Max)
CMA RAI-XX	9.6 g
CMA RA7-XX	26 g
CMA RA18-XX	14 g
CMA RA09-XX	6 g
CMA RA81-XX	28 g

◆ Caps

| Type	Weight (Max)
Thermoplastic plug cap (CMA BA06 ...)	4.5 g
Metallic plug cap (CMA BA65 …)	12 g
Elastomer extension cap (CMA BA94 ...)	6 g
Elastomer receptacle cap (CMA BA86-35MC …)	6 g
Metallic receptacle cap (CMA BA73 …)	38 g

◆ **Compatibility matrix**

	Extension Type 1	Panel through Type 3	Dummy receptacle Type 6	Receptacle Types 7 and R7	Elbow part 90°	Elbow part 105°	Straight backshell	Elbow backshell 90°	Thermo-plastic plug cap	Metallic plug cap

Metallic cap	●	●	●	●	-	-	-	-	-	-

**Attention : The mating connectors must have the same number of contacts and the same keyway.
Special case : A 10 contacts plug can mate a 14 contacts receptacle.**

Keyways

Front view

Receptacle

Plug
The keyways depend on the main key position. Positions of the 4 small keys, contacts and flats of the receptacle remain the same.

|		Keyways						
		N	W	X	Y	Z	P *	T
Angle α	04 contacts	105°	95°	115°	85°	125°	-	**
	06 contacts	80°	70°	90°	60°	100°	-	**
	10-14 contacts	95°	85°	105°	75°	115°	138°	**
	22 contacts	80°	70°	90°	60°	100°	-	**

* Keyway P allows the possibility to make 'double keyways' plug ex: CMA 5NP14 mating a N keyway receptacle AND a P keyway receptacle
** Keyway T mates with all keyways—tooling.

For types 1, 3 and 7 : consider the reverse

◆ **CMA RA7-XX backshell assembly**

Slide items on the cable as shown below

1	Locking backnut
2	Locking washer
3	Sleeve
4	Backshell body
5	Cable clamp nut

6	Tightening cone
7	Cable clamp
8	Stop cable
9	Plastic ring
10	Plug
Fig. A

Fig. B

A– Prepare the cable following Fig.A and Fig.B. The 'elbow plug' is the addition of an elbow part CMA RA8 between items 9 and 10.

B– To facilitate soldering operation, mate item 10 on counterpart tool BOUExxMENA01 (xx number of contacts).

C– Solder the wires (protection with heat-shrinkboots recommended).

D– Make a knot strongly tightened with the cable cord and introduce the knot in the slot of the plastic ring 9, cut extra nylon cord.

E– Bring the plastic ring 9 on the head of plug 10.

F– Slide the stop cable 8 on the plastic ring 9.

G– Spread the cable shield on the stop cable 8 and maintain it with the cable clamp 7.

H– Cut the extra cable shield.

I– Slide the tightening cone 6, then the cable clamp nut 5 and screw it on the stop cable 8.

J– Screw the backshell body 4 on the head of plug 10 mounted on the counterpart tool BOUExxMENA01.

K– Introduce the end of the sleeve 3 inside the backshell body 4. Put the locking washer in its place on the sleeve 3.

L– Screw the locking nut 1 on the backshell body 4 with a dynamometric key, tightening torque : 6N.m

ATTENTION : These information are only for information, procedure may vary following the type of cable and the number of contacts.

◆ **Cabling overview for CMA RA18-XXX and CMA RA24-XXX backshells**

1

-Prepare cable and backshell items (metallic clamp and heat shrink boot not included in the backshell part number)
-Solder the cable wires on the connector contacts

2

-Tighten (with the recommanded torque) the backshell on the connector.
-Tighten the metallic clamp to fix the cable shield on the backshell knurled area.
-Cover with a heat shrink boot, a molded part or proceed an overmolding operation.

◆ **Cabling overview of CMA RAIXX backshells**

1

-Prepare cable and backshell items
-Solder the cable wires on the connector contacts

2

-Tighten (with the recommanded torque) the backshell on the connector.
-Bring the assembly 'Ferrule-shield-cable ' in position inside the backshell pulling on the cable.
-Proceed the crimping operation following the datasheet and the recommended tools.

3

-Bring the Orings and the elastomer sleeve in position.

Cabling

◆ **Cabling overview of CMA RA81-XXX backshells**

1

-Prepare cable and backshell items
-Solder the cable wires on the connector contacts

2

-Tighten (with the recommanded torque) the backshell free ring on the connector giving the orientation wanted. (Orientation of the elbow by angle of 20°).
-Tighten the metallic clamp to fix the cable shield on the backshell knurled area.
-Cover with a heat shrink boot, a molded part or proceed an overmolding operation.
